Sheet 3 of 16

FIG. 6 is a schematic diagram of a circular structure. It features a large outer circle (70) and a smaller inner circle (71). Six small circles (72) are arranged in a hexagonal pattern between the two main circles. Six radial lines (73) connect the center of the inner circle to the centers of the six small circles. A horizontal line (74) passes through the center of the inner circle. A curved line (75) is located in the upper-left quadrant. A curved line (76) is located in the lower-right quadrant. A curved line (77) is located in the upper-right quadrant. A curved line (78) is located in the lower-left quadrant. A curved line (79) is located in the center of the inner circle.
